#### NOTES :

- If you do not find your master's or doctoral psychology program on this list, please contact the manager of the program to which you wish to apply.
- A reminder of the FRQSC rules:
  - Master's scholarship: To be considered a research program, a master's program must have at least 18 credits (or 40% of program credits) dedicated to research training and lead to the writing of a thesis (an essay, a research report or an article is not accepted).
  - Doctoral scholarship: To be considered a research program, a doctoral program must have at least 36 credits dedicated to research training and lead to the writing of a doctoral thesis.
- D.Psy, D.Ps. and Psy.D are professional postgraduate programs. While they do involve a certain amount of research, the number of credits dedicated to research is insufficient for these programs to be eligible for an FRQSC training scholarship.
